Professional Summary

Full-Stack .NET Developer with over seven years of commercial experience designing, developing and maintaining enterprise web, mobile and cloud applications using the Microsoft technology stack.

Experienced across C#, ASP.NET MVC, Blazor, .NET MAUI, Xamarin, SQL Server and Azure, with a proven track record of delivering scalable, high-quality software across the financial services and hospitality sectors.

Passionate about creating intuitive user experiences and building software that solves real business problems. Experienced in leading technical projects, integrating third-party systems, modernising legacy applications and delivering AI-powered solutions using OpenAI technologies and Model Context Protocol (MCP) servers.

Comfortable working across the full software development lifecycle, from requirements gathering and solution design through to deployment and ongoing support within Agile teams.

Core Technical Skills

Languages

- C#
- SQL (T-SQL)
- JavaScript
- TypeScript
- HTML5
- CSS3

Frameworks & Technologies

- .NET
- ASP.NET MVC
- ASP.NET Core
- Razor Pages
- Blazor
- Blazor Hybrid
- .NET MAUI
- Xamarin
- Vue 3
- Vite
- Tailwind CSS

Cloud & AI

- Microsoft Azure
- Azure Functions
- OpenAI API
- Model Context Protocol (MCP)
- REST APIs
- Firebase
- Google Analytics Data API

Databases

- SQL Server
- Entity Framework

UI Frameworks

- Telerik UI for Blazor
- Kendo UI
- Vue.js

Development Tools

- Azure DevOps
- Git
- GitHub
- Visual Studio
- VS Code
- Postman

Development Practices

- Agile
 - Scrum
 - CI/CD
 - Clean Architecture
 - SOLID Principles
 - Responsive Design
 - Component-Based Development
 - API Integration
 - Performance Optimisation
 - Pixel-Accurate UI Implementation
 - Cross-Platform Mobile Development
-

Professional Experience

Full-Stack .NET Developer

True Potential LLP | June 2019 - Present

Develop enterprise web, mobile and cloud applications using modern Microsoft technologies, delivering software across financial services and hospitality platforms while working collaboratively within Agile development teams.

Responsibilities & Achievements

- Design, develop and maintain enterprise applications using C#, ASP.NET MVC, Blazor, SQL Server and Azure.
- Deliver scalable, maintainable software following clean architecture and SOLID principles.
- Translate UI mock-ups and component style guides into responsive, pixel-accurate user interfaces.
- Develop reusable Blazor components to improve consistency and accelerate development.
- Build secure REST API integrations with internal and external systems.
- Optimise SQL Server databases, stored procedures and queries for performance.
- Participate in solution design, sprint planning, code reviews and technical discussions.
- Work closely with designers, QA engineers and stakeholders throughout the software development lifecycle.
- Develop and maintain both web and mobile applications deployed to production environments.
- Continuously improve application performance, maintainability and user experience.

Key Commercial Projects

Financial Services Platform

Develop and maintain enterprise financial software used within the financial services industry, delivering secure, scalable applications while introducing modern AI-powered functionality.

Key Contributions

- Developed enterprise applications using C#, ASP.NET MVC, Blazor and SQL Server.
- Built reusable front-end components and modern responsive interfaces.
- Designed and developed secure REST API integrations.
- Integrated OpenAI-powered functionality to automate business processes and improve user experiences.
- Implemented Model Context Protocol (MCP) servers, enabling AI assistants to securely interact with business systems and tools.
- Designed AI workflows combining OpenAI models with MCP integrations to deliver context-aware functionality.
- Worked extensively with Azure services and cloud-hosted applications.
- Improved maintainability by modernising existing systems and refactoring legacy functionality.
- Collaborated with stakeholders to deliver new business features within Agile sprints.

Technologies

C#, ASP.NET MVC, Blazor, SQL Server, Azure, REST APIs, OpenAI API, Model Context Protocol (MCP), Azure DevOps, Git

Matfen Hall App

Contributed to the ongoing development of the Walwick Estate hospitality platform, delivering guest-facing and administrative applications supporting hotel operations, bookings and membership functionality.

Key Contributions

- Led development of the Golf booking integration with third-party providers.
- Enhanced booking journeys and reservation workflows.
- Developed membership functionality and guest management features.
- Built administration tools for content management and operational workflows.

- Implemented push notifications and guest communications.
- Developed mobile application functionality published to the Apple App Store and Google Play.
- Worked across Blazor Hybrid, .NET MAUI and Xamarin applications.
- Collaborated with designers and stakeholders to deliver polished user experiences.
- Improved maintainability through reusable components and modern architecture.

Technologies

C#, .NET MAUI, Xamarin, Blazor Hybrid, ASP.NET, SQL Server, Firebase, Azure, REST APIs

Personal Projects

Developer Portfolio

Designed and developed a modern developer portfolio showcasing commercial experience, projects and technical expertise.

Portfolio

<https://lornafatmi.dev>

Highlights

- Built using Vue 3, TypeScript and Tailwind CSS.
- Responsive design with modern animations.
- Custom component architecture.
- GitHub Pages deployment.
- Custom domain configuration.
- SEO optimization and social sharing support.

Technologies

Vue 3, TypeScript, Tailwind CSS, Vite, GitHub Pages

Additional Experience

- Enterprise software development
- Financial services platforms
- Hospitality software

- Mobile application development
 - AI-powered software development
 - OpenAI integration
 - Model Context Protocol (MCP)
 - Third-party API integration
 - Google Analytics Data API
 - Azure cloud services
 - Responsive web development
 - Pixel-perfect UI implementation
 - Component library development
 - Performance optimisation
 - SQL optimisation
 - Agile software delivery
 - Code reviews and collaborative development
-

Education

MSc Computer Science

University of Sunderland | 2022 – 2023

BSc (Hons) Computing – First Class

University of Sunderland | 2016 – 2019

Professional Strengths

- Strong problem-solving skills
 - Excellent communication and stakeholder engagement
 - Passion for clean, maintainable code
 - Comfortable taking ownership of technical features
 - Strong attention to detail
 - Quick learner with a passion for emerging technologies
 - Experienced working in collaborative Agile teams
 - Committed to delivering high-quality software and exceptional user experiences
-
